- Jorne Laton
- Patrick Provinciael
- Wouter Van Rossem
- Sina Khakbaz Heshmati

1.2 Revision History

Rev.	Date	Description
1.0	April 4, 2010	First draft created
1.1	April 5, 2010	Updated after QA

2 Evaluation of conference

2.1 Evaluation of our presentation

First we discussed our own presentation.

Part 1 There were some minor flaws in Sina's presentation. He didn't address all the items as discussed in the preparation meetings. Also, because Dutch is not his native tongue, the tempo of the presentation was a bit low. Therefore it would be better if next time he did his presentation in English.

Part 2 The overall impression of the group was positive for the demo.

Part 3 This part was also considered positive by the group. However, one improvement for next time would be that the discussed items should be linked with previous events.

Also, in the next conference we should lay more emphasis on what we have learned, since it seemed that this interested prof. Vermeir.

2.2 Impressions and comments on other groups

Group 3:

- The impression that our group got, was that it seems that they just want a working website, but aren't really interested in exploring new technologies
- Currently their website doesn't look robust, since they did not show any invalid input.
- Their demo was also quite ingenious. One person gave the actual demo, while someone else was interacting with the system on the background.
- The diagram with the amount of hours worked on the different tasks during both semesters was considered a nice idea as well.

Groep 1:

- The fact that the project manager of this group was absent didn't feel very professional.
- The functionality of their website seems to resembles ours somewhat.

- They laid a lot of focus on the css of their website.
- The amount of hours worked on their timesheets is rather low compared to the other groups.

3 Planning Easter Holiday

During the Easter Holiday we will focus on updating the documents, but also continue implementing. Sina will create a new division of labour for this. The amount of time spent on quality assurance should also be reduced from now on.

4 Agenda

A complete list of Agenda items is available on [1].
