

Minutes Conference Meeting

Nick De Cooman

March 31, 2010

1 Meeting Information

Date: Monday, March 29, 2010

Time: 14H00-16H00

Place: 5F212

1.1 Attendees

Following members were present:

- Nick De Cooman
- Sina Khakbaz Heshmati
- Bart Maes
- Wouter Van Rossem

1.2 Revision History

Rev.	Date	Description
1.0	March 31, 2010	First draft created

2 Scope

In order to report the current state of all three *Software Engineering* projects, a conference is held on March 31. In a presentation of 30 minutes several aspects of the development should be highlighted, including managment information and a demo.

3 Implementation progress

The slides about the implementation progress were made collaboratively. Moreover, we discussed that the focus should be on the fact that JBoss Seam makes the development slow due to a steep learning curve, but that it returns a lot of power and flexibility at the same time.

4 Demo

To be able to present a smooth demo, a scenario was written down. It treats the following subjects:

- User registration
- Email service
- Language support
- User space
- Search engine
- Placing auctions

5 Management information

All slides about the management information were discussed. In general, only some minor changes have to be made.

6 Next

By having all slides ready now, the presentation can be rehearsed. This will be done in an extra conference meeting on Tuesday March 30, 2010 at 16h.
